Best cheap android tablet for drawing

Tablets - compared to smartphones - are often seen as luxury goods. And with so many of them costing quite a bit of coin, there is some justification for that view. But what if you don't have to pawn your condo to buy it? There are plenty of budget options out there, and if you're willing to compromise, you can easily snare yourself an excellent tablet for \$200 or less. Cheap tablets have improved in recent years as prices dropped and monster smartphones began to eat into the tablet market. If you have a limited budget, here are the best cheap tablets that \$200 or less will buy you. Looking for more tablets, and not limited by price? Check out the list of the best tablets money can buy and Black Friday tablet deals. Amazon Fire HD 10 2019 This is an entertainment tablet to get whether you want to read or watch movies at a reasonable price. Our review praised it for its full HD display resolution of 1920 x 1200 pixels or 224 pixels per inch, which offers a superior viewing experience. The Fire HD 2019 edition measures 10 inches and comes with 32GB or 64GB of internal storage, with more capacity available if you add a microSD card. It sports a 2GHz octa-core processor powered by 2GB of RAM with a battery life lasting up to 12 hours to read, surf the web, watch videos, and listen to music. With a USB-C connection, it also supports faster charging and comes with a USB-C cable and a 9W power adapter. It also operates hands-free with Alexa. Unfortunately, the camera is just so-so with a 2 megapixel front and 2MP rear camera and 720p HD video recording – but if you don't use it as your main snapper, it should work fine. Read our Fire HD 2019 edition review Onn Tablet Android Tablet 8-inch Onn offers light and fast performance accompanied by 800 x 1280 resolution so that your photos, movies, apps and documents look crisp, clear and vibrant. The tablet runs Android 9.0 Pie with 2GB of RAM on a 1.3GHz quad-core processor. It doesn't sound like much, but it brings enough power to get you through games, movies, web surfing, email, e-books, music, and more. The camera resolution is low — only 2MP for the rear camera — but if your focus is on viewing rather than creating content, you're in luck. Amazon Fire HD 8 2020 If you miss the tablet, but have less than \$100 to go out for it, you won't go wrong with the 8-inch edition of Amazon Fire HD 8 2020. The latest version of this tablet comes with 32GB or 64GB of internal storage and is powered by 2GB of RAM. It's not high power but doing the job gives you extra space to enjoy your favorite apps like Netflix, Facebook, Hulu, Instagram, TikTok, and more through Amazon's Appstore. It features durability throughout the day with up to 12 hours of reading, surfing the web, watching videos, and listening to music with a USB-C connection charging in less than five hours. The tablet has a new Game Mode designed to improve gaming experience and is compatible with Alexa. Our review criticizes the latest incarnation of this tablet for its screen resolution of only 800 x 1280 pixels, which our reviewers say is sub-par. It also seems to affect maximum brightness, which reduces the ability to see and work in direct sunlight. The color is also slightly muted. We also dinged for a sluggish performance. Nonetheless, we rate Amazon Fire HD 8 2020 to be a solid budget option for those who want an entertainment engine, or one that's attached to the Amazon ecosystem. Read our Amazon Fire HD 8 2020 review Our Max 10 device delivers some very impressive specs at an excellent cost, even if Dragon Touch is not one of the best known tablet manufacturers around. You get a 64bit octa-core processor with 1.6GHz speed, 2GB of RAM, 32GB of storage, and a microSD card slot that will let you add up to 128GB. It also has an 8MP main camera and a 2MP front camera. Best of all, there's a 10-inch screen with a resolution of 1920 x 1080 pixels for full HD quality visuals. If you want to play games and watch movies, Dragon Touch Max10 will serve you well. It's a stylish tablet that feels more expensive than that. This Samsung Galaxy Tab A8 Portable Tablet is an excellent mix of quality and build specifications, all at a price you'll love. As the name suggests, Samsung's budget tablet has an 8-inch screen, and the 1280 x 800 resolution is great to read. It has a decent quad-core processor inside with 2GB of RAM, which is slightly better than average for this price point. You also get 32GB of storage, while there is room for a microSD card. The battery life is excellent, with 5,100mAh cells able to last well for a day of use. The Galaxy Tab A8 includes an 8MP camera, as well as a 2MP front camera, so it's a cheap tablet to use if the camera is important to you. Lenovo Tab M10 Plus We recommend this tablet as it comes in well below \$200 and a medium sized 10.3 inch screen. The resolution comes in at 1280 x 1920 pixels, which is far superior to previous Lenovo models. You get impressive sound quality at a great price, not to mention the screen is also flanked by dual front stereo speakers on the top edge. There's an octa-core processor, 2GB of RAM, and 32GB of storage inside with space for a microSD card. The main camera rating is 8MP, and there is a 5MP front camera as well. There is also a large 7,000mAh battery for up to 10 hours of juice on the go. It runs Android 9.0 out of the box, with some Lenovo apps. Simply put, the Lenovo Tab M10 Plus is an absolute bargain. Tablet Recommendation Editor is very useful, even if you want to be productive — and now that the Android tablet crop is pretty solid, we think it's time to hash out which ones For all the criticism that iPads and other tablets give because it's just a toy, they really have... Read moreDo you use it as a An eBook reader, portable Netflix machine, retro arcade game, or digital comic book library, a good tablet can be a great addition to your gadget arsenal. However, with Android jumping on the tablet scene, there are more tablets to choose from than ever before, and it can be difficult to find the best of the best. Read more Source: Jeremy Johnson/ Android Central Best Android Tablet Under \$100 Android Central 2020 Android tablet market is falling apart; You don't have to spend a lot of money to find the best Android tablet under \$100. You'll find some pretty sweet diamonds in the rough without the need to break the bank. In fact, some of the best options also deserve to be ranked with the best Android tablet overall. Source: Amazon Amazon does a fantastic job in producing tablets for those who need a friendly device Fire HD 8 is one of our favorites with 12 hours battery life, an 8-inch HD display, and easy access to the world of Amazon services. Fire HD 8 has access to alexa free of love, which means it can act as a smart speaker if you have questions. Plus, you'll be able to clearly hear Alexa's answer by Built-in Atmos speakers. As expected, Amazon's Fire Tablet runs a modified Version of Android, with no out-of-the-box access to the Google Play Store. Instead, you'll have to rely on the Amazon App Store or load the Play Store into Fire HD 8. 32GB or 64GB Alexa Hands-free storage Four color options Dual Dolby Atmos speakers Only 2GB ram 2MP front and rear cameras No access to the Google Play Store Tablets are excellent for consuming Amazon The Fire HD 8 content is a fantastic option for budget-friendly tablets, especially if you like everything Amazon has to offer. Source: Vankyo When it comes to budget tablets, there are some concerns that manufacturers will throw too much bloatware onboard. That's not the case with the Vankyo MatrixPad S10, as no bloatware can be found, providing an almost stocky Android experience. This 10.1-inch tablet makes media consumption easy, along with 32GB of onboard storage. There's also an 8-megapixel rear camera if you like taking pictures with a large viewfinder. Plus, there's a microSD card slot to store a lot of your favorite content, images, and videos. Although there is microSD card support on board, it has been limited to support cards up to 128GB. This is an annoying inclusion, because you will end up running out of space if you plan to load movies and TV shows. Eight hours of battery life will likely not last all day, so you'll want to keep a portable charger nearby. HD screen 10.1-inch Near-stock HD Display Android 32GB of onboard storage 8-megapixel rear camera Support microSD card limited to 128GB Only available in battery life Black Mediocore Get a large screen for media consumption The best Vankyo MatrixPad Z4 is an excellent tablet for the price point with a 10.1 inch HD screen and solid specification sheets. Source: Amazon May be difficult to keep kids busy, whether you're at home, on the street, or at a friend's house. Amazon Fire 7 Kids Edition helps do just that with access to Amazon Kids+. It provides a lot of content and games to not only teach your kids a lesson but let them have fun at the same time. Amazon also provided a two-year worry-free guarantee, meaning that if something happens to the Fire 7 Kids Edition, the company will replace it. This is in addition to the built-in Kid-Proof case, which has a kickstand on the back so it will be safe from accidental eventual drops. Between warranty, including cases, and access to Amazon Kids+, it's easy to understand why this is one of the best Fire Tablets for kids. For better or worse, there's only one speaker included with the Fire 7 Kids Edition. If your child is hard to hear, this may not be the best solution, but it will be able to be at the service of most. While touting the inclusion of front and rear cameras, they are only 2 megapixel sensors and will eventually become more opaque. Two-year warranty including Amazon Kids+ microSD card support up to 512GB Included Case Only 1GB of RAM Single speaker Poor front and rear cameras Keeping kids busy With Amazon Kids+ access included and including Kid-Proof cases, Fire 7 Kids Edition is fantastic for small children. Source: Lenovo Lenovo M8 Smart Tab is different from others, as you can turn this tablet into a smart screen for the Google Assistant. With the included charging dock, you can place the M8 Smart Tab into the dock and it will be presented with Google Assistant Ambient View, similar to what you'll get with Nest Hub. Not only can you get a portable smart screen, but Lenovo has packed in two speakers installed in addition to dolby atmos features. This ensures that your speakers will fill the room, even if you don't have a tethered M8. And it's lighter than other 8-inch tablets, making it more portable and easier to carry around if you need to be on the road. Unfortunately, there are some pitfalls with the Smart Tab M10 HD, as it is only shipped with 2GB of RAM. Those hoping for multi-tasking tablets may want to look elsewhere. This makes a little more sense when looking at the date design with a large bezel around the screen. Storage expansion of up to 1 TB Transformed into Google's Smart Screen Assistant when docking Dolby Atmos sound with two speakers mounted next to the Smart Dock including Just include a 2GB ram Date Dock design that's for a smart screen Tablet Lenovo Smart Tab M8 is fantastic if you want a hybrid tablet/smart screen while offering great sound. Source: Amazon Year after year, Amazon Fire 7 tablet continues to be one of the most popular tablets available. Maybe it's a price point, or maybe it's a combination of pricing and access to Amazon's digital content suite. The 7-inch tablet offers seven hours of battery life, up to 32GB of expandable storage, and provides access to Amazon Alexa with just your voice. There is even dual-band WiFi support, so it's easy to use this wherever your ride takes you. On the other side of the fence, you have to deal with the display of incoming subpars at a resolution of only 1024x600. And while the processor has been updated, Amazon only includes 1GB of RAM, so don't expect to do heavy gaming or multitasking. Seven hours battery life Storage that can be expanded to 512GB Alexa hands-free Only 1GB ram 2-megapixel front and rear Lower density Camera Large entry-level tablet display to pair with Amazon The Amazon Fire 7 service is a fantastic entry-level tablet with access to Amazon content, but the specs could be better. Source: Vankyo It can be frustrating when dealing with apps that take up a lot of space on your devices and tablets. But if you find a tablet like the Vankyo MatrixPad Z1 with its Android Go certification, you don't worry about the problem. The Go app is optimized to enjoy your content, regardless of how your tablet is held back. Some possible concerns you might run into involve hardware at the bottom of the screen. We'd like to see support for more than 128GB of microSD storage expansion, as 32GB isn't enough at the moment. Lower density screens won't be crisp, even on a 7-inch screen, and with only 1GB of RAM, you might end up getting a bottle neck even with Android Go. Certified for Android Go 32GB from a built-in 178 degree viewpoint MicroSD Expansion is limited to 128GB Only 1GB lower RAM density display Get an almost stocked Android experience in the small package The MatrixPad Z2 gives you access to an almost stocked Android experience with an excellent vantage point and more. If you're looking for the best Android tablet under \$100, you can't get any better than Amazon Fire HD 8. The 8-inch HD screen will beautifully showcase all your favorite content as it transforms into a super-powered e-reader if opportunities arise. You get access to all of Amazon's content in lightweight and portable packages that will continue to be a joy to use. This, combined with 10 hours of battery life and you will definitely use this tablet throughout the day, and then some. We warn you that this is not a traditional Android tablet, as it has a pre-installed Amazon Fire UI overlay with the Amazon App Store. You can get the Google Play Store, but it will require a little work and should not be done by just anyone.
